September 10, 1986

Mr. Ben Nutt  
Queen City Marble Company  
1700 E. Chestnut Expressway  
Springfield, MO 65802

Dear Mr. Nutt:

This is regarding the Queen City Marble Company and past waste disposal activities. It was reported to this office and confirmed by the Springfield Sanitary Services personnel that waste material from equipment cleanup had been dumped on the ground behind the facility in the past. Acetone and possibly other solvents had been used in the cleanup and residuals of the solvents may be of environmental concern.

Please note that Department of Natural Resources regulation 10 CSR 25-4.010 (1)(D), paragraph 1, states that persons who generate less than regulated amounts of hazardous waste are not subject to the generator requirements and storage regulations provided the wastes are properly managed. Paragraph 3 of that rule states that accumulated waste must be rendered non-hazardous or delivered to an approved facility such as a sanitary landfill or approved hazardous waste disposal facility.

Also note that, although small quantity generators (less than 220 pounds per month) are exempt from the generator requirements, Section 260.380.2.(1) of the "Missouri Hazardous Waste Management Law" states that all hazardous waste generated shall be handled in such a way as to not pose a threat to the environment.

Following their review of the file information, the Enforcement Unit of the Waste Management Program of the Department of Natural Resources is requesting sample analyses to be submitted for the area where waste has been dumped. The samples should be collected at a depth of 0 to 6 inches and should be tested for parameters to include all solvents used at the facility.

1700 E. Chestnut Exp.

You must advise us of the date on which sampling will be performed so that we may be afforded the opportunity to split samples with you. The sampling results will be used to determine what, if any, additional action will be required at the site. If you have any questions regarding this matter, please advise.

Sincerely,

SPRINGFIELD REGIONAL OFFICE

Charles L. Kroeger  
Environmental Specialist
